

MK-677 (Ibutamoren) – Pre-Research Compliance Checklist

This checklist is intended for licensed laboratories and qualified researchers preparing to work with MK-677 (Ibutamoren) under lawful research-only conditions in the UK, EU, or US. All use must be in accordance with regulatory guidelines and safety protocols.

- ☒ MK-677 is clearly labelled: 'For Research Use Only – Not for Human or Veterinary Use'.
- ☒ Certificate of Analysis (CoA) is on file and matches batch number and purity.
- ☒ Material Safety Data Sheet (MSDS) has been reviewed and archived.
- ☒ Storage conditions verified: sealed, cool/dry place, ideally –20°C.
- ☒ Researcher handling MK-677 has appropriate training and PPE (gloves, goggles, lab coat).
- ☒ Access to compound restricted to authorised laboratory personnel.
- ☒ Proper documentation/logs maintained for: acquisition, handling, dosage, disposal.
- ☒ MK-677 will be used solely in approved in vitro or non-human models.
- ☒ No marketing, discussion or materials suggest human ingestion or enhancement.
- ☒ Disposal of MK-677 and any residuals follows licensed chemical waste protocols.

Reminder: Possession or marketing of MK-677 outside a research context may breach UK Human Medicines Regulations, FDA law, or EU Directive 2001/83/EC. Always consult legal counsel before initiating work.
